Acupuncture/Moxibustion/TDP lamp: I understand that acupuncture is performed by the insertion of sterile single use needles through the skin or by the application of heat to the skin at certain points on or near the surface of the body in an attempt to treat bodily dysfunction or diseases, to modify or prevent pain perception, and to normalize the body's physiological functions. Acupuncture and Moxibustion/TDP lamp are typically safe methods of treatment, however certain adverse side effects may result. These could include, but are not limited to: local bruising, minor bleeding, dizziness, fainting, pain or discomfort, and the possible aggravation of symptoms existing prior to acupuncture treatment. I understand that no guarantees concerning its use and effects are given to me and that I am free to stop acupuncture treatment at any time.

Pregnancy: I will notify the Acupuncture and Massage Associates should I become pregnant or if I am in the process of trying to become pregnant so that my practitioner can avoid points and herbs that could induce miscarriage. Otherwise, Chinese medicine treatment can be very beneficial in the pregnancy and birthing process.

These could include, but are not limited to: bruising, sore muscles or aches, and the possible aggravation of symptoms existing prior to treatment. Evox/Zyto Bioscans: I understand that Zyto and Evox Bioscans are not to treat or cure any illnesses but to balance the imbalance and emotional incoherence of the body.

Injection Therapy: Whenever a needle is introduced through the skin, inherent risks are present. Although the risks are small, the expected benefit from the procedure must outweigh the possible risks. Make sure that you have a thorough understanding of the expected benefit from the injection. The risks of injection depend on where the injection is made and what is being injected. If the injection is made in a large muscle, the risk of hitting vital structures is very small or nonexistent. Injections made in the area of neurovascular bundles (where nerves, veins, and arteries travel together) have a higher risk of injury, and injections in the area of the lung organs have a higher risk of injuring them. Allergic reaction to injected substance: Allergic reactions to homeopathic substances have not been reported, and, in fact, they are used to treat allergic conditions. However, the possibility still exists with any type of injection. *B12 Injections should not be used if: you have allergy to B12, Leber's disease, megaloblastic anemia, or history of blood clots. If you have any of these conditions please let your practitioner know.

The **LIPO-VITE injection** contains Thiamine(B1), Riboflavin(B2), Niacinamide(B3), Dexpanthenol(B5), Pyridoxine(B6), Hydroxycobalamin(B12), Vitamin C, Methionine, L-Carnitine, Inositol, and Choline. **Sensitivity to any of these and/or cobalt, lidocaine, benzyl alcohol or sulfur is a contraindication. *RISK & POSSIBLE EFFECTS- Risk of allergic reaction, tenderness at injection site, infection at injection site as with all injections. We do not recommend anyone under 18 years of age, or anyone with Leber's Disease (hereditary optic neuropathy), and/or Chronic Kidney or Liver Disease receive a LIPO-VITE injection unless a doctor's note has been provided. ***The only patients who would be unable to take LipoVite injections are those that have an allergy to Sulphur. This is because methionine is an enzyme that contains Sulphur. If this is the case, there are other injections you can take for weight loss that do contain essential enzymes and vitamins that do not contain any Sulphur.**
